

POLICY >

INTEGRATED MANAGEMENT

CAP. I – OBJETIVO

This Policy is committed to achieving and maintaining high standards of quality, health, safety, and sustainability in all its operations. This policy reflects our commitment to excellence, customer satisfaction, continuous improvement, compliance with applicable legislation and regulations, adding value and credibility to our company.

CAP. II – CAMPO DE APLICAÇÃO

This policy applies to all Agrex employees in Brazil.

CAP. III - DIRETRIZES GERAIS

Agrex do Brasil is committed to provide products and services in the agribusiness sector that meet or exceed our customers' expectations, generating value and social credibility for our company in this sector. Our commitment to quality is fundamental in all our operations, being based on the constant search for a culture of continuous improvement and risk management to ensure compliance with the highest international standards, bringing greater competitiveness to our business.

CAP. IV - CONTEÚDO ESPECÍFICO

Agrex do Brasil promotes, protects and encourages the physical integrity of its employees, service providers and visitors through safe conditions and behavior, preventing injuries and incidents.

Agrex do Brasil recognizes that the involvement and continuous development of employees are essential to organizational success. Invests in training and capacity building to ensure that all employees understand and contribute to our integrated management system objectives.

Agrex do Brasil works to establish a solid culture among all stakeholders regarding good environmental practices, especially those where its actions have the potential to cause harm, even with all recommended care and techniques. It requires the same from everyone involved in the business, whether internal or external, whenever applicable.

By committing to pacts with civil society, such as the Soy Moratorium, it uses its position in the value chain to help protect forests and supports the market in the search for increased environmental performance.

Agrex do Brasil offers farmers technical support regarding good environmental management and regularization practices, as well as access to the best techniques and technologies to promote rural economic development with an emphasis on responsible production and sustainability.

And understood that all environmental governance practices demonstrate everyone's dedication to contributing positively and relating constructively with local communities.
